

SorachanCoin *DriveInfo Wallet*

ドライブ故障予測 ブロックチェーン

SorachanCoin

ハイブリット型 Coin
POW + POS (3%/year)

増加するドライブのバックアップに疲弊していませんか？
バックアップの回数を少しでも減らすための画期的な方法をご提供いたします。
それが、ブロックチェーンを活用したドライブ故障予測ソフトウェア
SorachanCoin DriveInfo Wallet です。

The screenshot displays the SorachanCoin DriveInfo Wallet application window. The interface includes a menu bar (File, AddressBook, Settings, Help) and a toolbar with navigation icons for Overview, Send coins, Receive coins, Transactions, Minting, Multisig, BlockExplorer, and DriveInfo. The main content area is titled "Drive Information" and contains a table with the following data:

ID	Description	Current	Worst	Threshold	Data	RAW
SatoshiA	[HDD-BlockChain] Check the status of each sector including MFT	68	55	70	----	----
SatoshiB	[HDD-BlockChain] Fluctuation of sectors at fixed intervals	90	90	70	----	----
SatoshiC	[HDD-BlockChain] Reaction rate	92	92	70	----	----
0x01	[HDD] Unreadable percentage before correction	200	200	51	0 01 00 0000 ...	
0x03	[HDD/SSD] Start up time	177	168	21	4125 03 1d10 000...	
0x04	[HDD/SSD] Number of starts	100	100	0	972 04 cc3 0000...	

Below the table, a "failure Signal" section shows a warning:

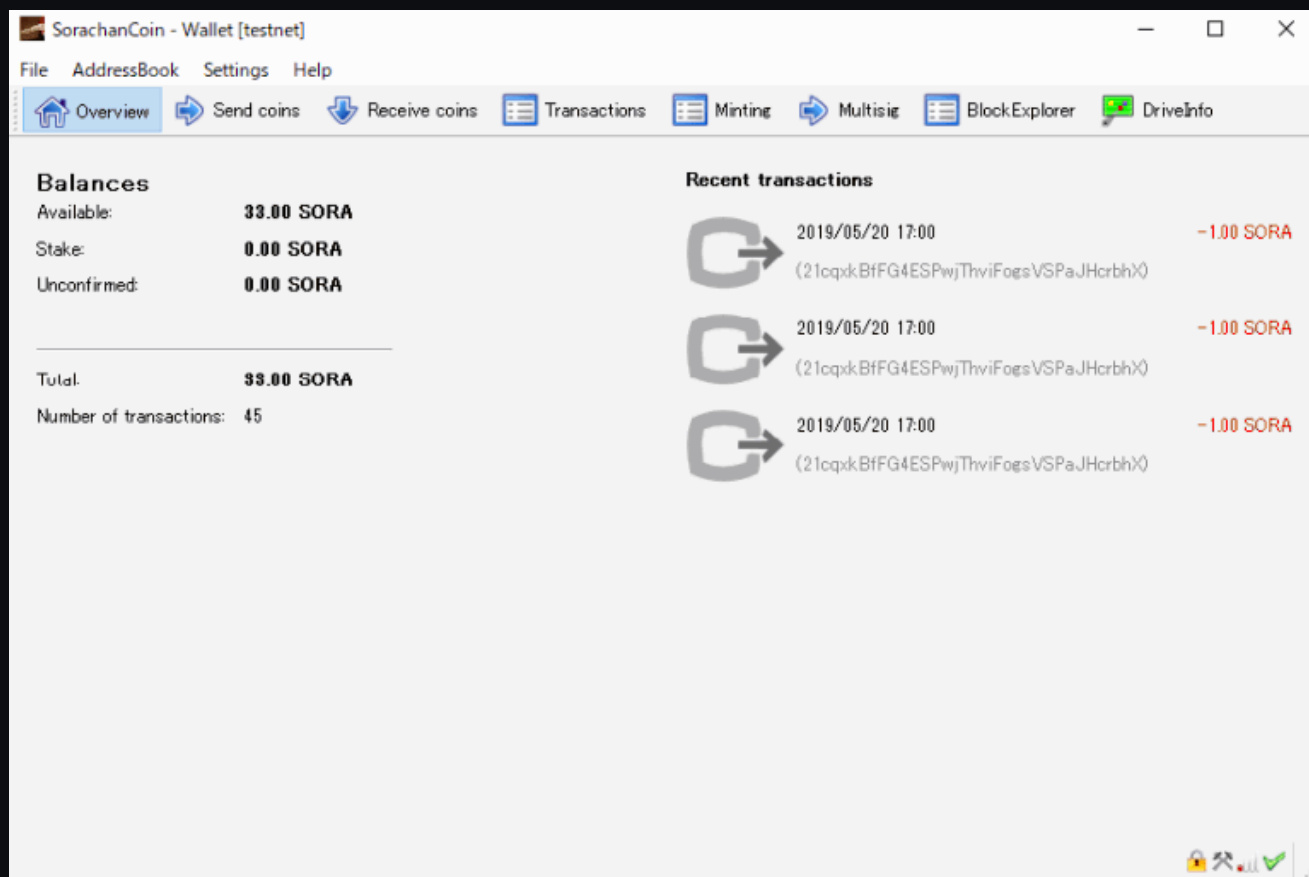

failure Signal	Nonce	failure Description
0	595220	WD20EFRX-68AX9N0(DiskNumber-02) There is a sign that the occurrence of bad sectors is near!

2019 3Q 上場予定で開発・運営しておりますThe SorachanCoin Developersと申します。
自分自身もバックアップに悩まされている一人でございます。
しかしながら、決め手になるような故障予測がないため、常に故障する事を念頭に運用しているのが現状です。
しかも、壊れやすい多層タイプのフラッシュメモリが、いよいよ増えてきております。
